Summary of Position

We are looking for a passionate leader to invigorate our molecular biology team. This leader is expected to be well-versed in new advancement in scientific field and is excited in creating continuous innovation to serve the research communities. In addition, he/she is responsible for coordinating and managing team activities to satisfy current customers' requests for product and service.

Responsibilities and Job Duties

- Direct and implement initiatives to develop novel products for unmet market needs.
- Drive organizational competitiveness and profitability.
- Manage team activities and ensure product quality and on-time delivery.
- Develop policies, procedures and SOPs to support reproducible and consistent manufacture process.
- Consult upper management team on new frontiers and competitions of market.
- Develop business partners for product line expansion.
- Coach staff technically and emotionally, and build a collaborative and inspirational team environment.

Qualifications

- Must have Ph. D (or equivalent) in life science and knowledgeable in molecular biology and cell biology.
- At least 3-year experience in biotech industry with managerial role.
- Must possess excellent written and verbal communications skills.
- Must be self-motivated and be passionate about turning science into products.
- Must possess ability to handle multiple priorities in a fast-paced environment.
- Ability to work collaboratively with internal stakeholders cross functionally.
- Self-awareness and ability to influence others.

Supervisory Responsibilities

Yes, and will manage 10 team members directly and indirectly.

To apply for this role, please send your CV/Resume along with a cover letter to jobs@origene.com. Please Reference "Director/Sr. Director, Molecular Biology" in the Subject Line.
