

Job Title: Sr. Research Associate – Molecular Biology

Company Information: OriGene Technologies (Rockville, MD) is a biotech company commercializing millions of gene-related reagent tools for life science research. Recognized globally as one of the world's largest sources for cDNA clones, recombinant proteins and antibodies, OriGene continues to drive innovation in CRISPR, assay development and in vitro diagnostic field. For more information, please visit our website: www.origene.com

Summary of Position

This is a hands-on position responsible for manufacturing molecular biological products for the OriGene's customers. The incumbent in this position will perform the experiments independently following SOP to generate QC passed molecule biological products and to deliver the final products to the customers within required time frame.

Responsibilities and Job Duties

- Follow SOPs to perform independently some of molecular biology experiments.
 - Vector design and construction
 - Sequencing
 - Sequence analysis using common software, such as Sequencher
 - Tissue Culture
 - Transfection
- Operate and maintain laboratory instruments independently.
- Maintain lab stocks, solutions, reagents, and supplies.
- Keeps laboratory records up to date in a timely manner and has accurate and complete data.
- Writes protocols and technical reports.
- Presents summarized experiment data and conclusions, both verbally and in writing at department and/or cross departmental team meetings.

Minimum Qualifications

Education & Experience

- BS degree in Biology, Biochemistry or in a related life science field with a minimum of 4 years of related industry experience.
- Intermediate DNA cloning and molecular biology skills are required.
- Excellent experience in some of specific molecular biological field.

Knowledge, Skills and Abilities

- Communicates effectively within own team and cross functionally on all matters.
- A team-player. Work well in a cross functional team environment.
- Ability to multi-task under pressure.
- Processes good computer skills, familiar with various software applications including Microsoft Outlook, Word, Excel, and Power Point.
- Willing to share information and resources within groups and cross functionally to meet business needs of others, and respond to business needs with flexibility.
- Deals with conflict calmly, seeking resolution by active listening and compromise.
- Admits mistakes and take responsibilities for actions.
- Ability to anticipate the needs of the team and department and work to meet those needs.
- Cultivates an environment that promotes positive dynamics within and across departments. , and encourages and facilitates collaboration across departments.
- Ability to identify root cause and develop a solution to solve the issue independently.
- Ability to plan and prioritize time and tasks to perform multiple assignments efficiently and independently, and demonstrate high level productivity.
- Ability to trouble shooting when experiment failed.
- Ability to prioritize multiple assignments base upon business and customer needs
- Ability to respond to data and technical issues by providing solutions that are practicable, thorough and consistent with company's objectives.

Preferred Qualifications

- Master in adobe Photoshop is a plus.
- Skills to use Sequencher and primer design softwares.
