Product datasheet for RR208658

Crebbp (NM_133381) Rat Tagged ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Crebbp (NM_133381) Rat Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	Crebbp
Synonyms:	CBP; RSTS; RTS
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)

ORF Nucleotide Sequence:

```
>RR208658 representing NM_133381

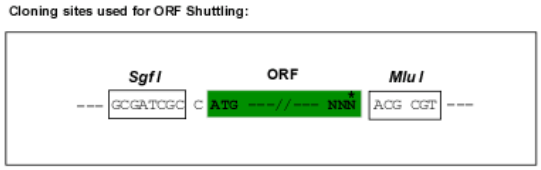
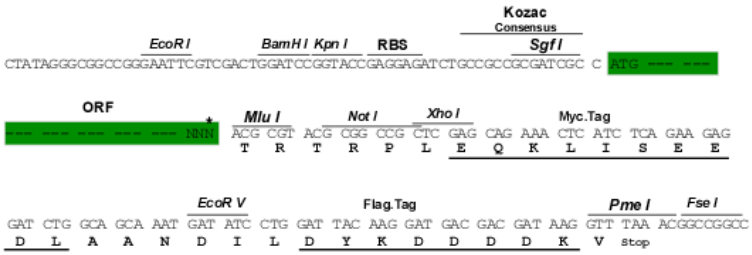
Cloning Scheme:





* The last codon before the Stop codon of the ORF

ACCN:	NM_133381
ORF Size:	7332 bp
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	NM_133381.3, NP_596872.3
RefSeq Size:	10103 bp
RefSeq ORF:	7335 bp
Locus ID:	54244
Cytogenetics:	10q12
MW:	265.6 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use.
