Product datasheet for AM00860PU-N

Growth Hormone (GH1) Mouse Monoclonal Antibody [Clone ID: 090-12210]

Product data:

| Product Type: | Primary Antibodies |
|-----------------------|--|
| Clone Name: | 090-12210 |
| Applications: | ELISA |
| Recommended Dilution: | ELISA. |
| Reactivity: | Human |
| Host: | Mouse |
| lsotype: | lgG1 |
| Clonality: | Monoclonal |
| Immunogen: | hGH isolated from human pituitary gland |
| Specificity: | This antibody reacts to Growth Hormone (hGH). Cross-reactivity: Synthetic hGH (Somatonorm): 100% Human Placental Lactogen: 0.02% Human Prolactin: 0.02% |
| Formulation: | 10mM Phosphate, pH 7.4 containing 150mM Sodium chloride and 0,09% sodium azide State: Purified State: Liquid purified IgG (0.2µm filtered) |
| Concentration: | lot specific |
| Purification: | >90% pure (SDS-PAGE). Protein A chromatography |
| Conjugation: | Unconjugated |
| Storage: | Store the antibody undiluted at 2-8°C for one week or (in aliquots) at -40°C for longer. If aliquoted for long term storage, fill volume should be equal to or greater than 50% of the nominal fill volume of the vial used. Avoid repeated freezing and thawing. |
| Stability: | Shelf life: one year from despatch. |
| Gene Name: | growth hormone 1 |
| Database Link: | <u>Entrez Gene 2688 Human</u> <u>P01241</u> |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | Growth Hormone (GH1) Mouse Monoclonal Antibody [Clone ID: 090-12210] – AM00860PU-N |
|-------------|--|
| Background: | Human growth hormone (hGH) plays an important role in growth control. Its major role in stimulating body growth is to stimulate the liver and other tissues to secrete IGF-1. The effects of hGH in the body can be generally described as anabolic. It stimulates amino acid uptake and protein synthesis in muscle and other tissues. Growth Hormone (GH1) is synthesized by acidophilic or somatotropic cells of the anterior pituitary gland. Genes for growth hormone (GH) are found in a gene cluster on 17q, which consists of two growth hormone genes and three CSH genes. The GHN1 gene is transcribed exclusively in the pituitary, whereas the other 4 genes are expressed only in placental tissues. Several isoforms of GH1 exist. |
| Synonyms: | Pituitary growth hormone, Growth hormone 1, HGH |
