

## Product datasheet for **AM00975PU-N**

### Luteinizing Hormone beta (LHB) Mouse Monoclonal Antibody [Clone ID: 057-10036]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	057-10036
Applications:	ELISA
Recommended Dilution:	ELISA.
Reactivity:	Human
Host:	Mouse
Isotype:	IgG2a
Clonality:	Monoclonal
Specificity:	This antibody reacts to Luteinizing Hormone.
Formulation:	10mM Phosphate, pH 7.4 containing 150mM Sodium chloride and 0.05% sodium azide State: Purified State: Liquid purified Ig (0.2µm filtered)
Concentration:	lot specific
Purification:	>90% pure (SDS-PAGE). Protein A chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one week or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	luteinizing hormone beta polypeptide
Database Link:	<a href="#">Entrez Gene 3972 Human P01229</a>
Background:	Luteinizing Hormone is a member of the glycoprotein hormone family. Glycoprotein hormones are heterodimers consisting of a common alpha subunit and an unique beta subunit which confers biological specificity. LH is expressed in the pituitary gland and promotes spermatogenesis and ovulation by stimulating the testes and ovaries to synthesize steroids. Mutations in the Luteinizing Hormone (LHB) gene are associated with hypogonadism which is characterized by infertility and pseudohermaphroditism.
Synonyms:	CGB4; hLHB; LH-B; LSH-B; LSH-beta
