Product datasheet for AM01267FC-N

Tlr2 Rat Monoclonal Antibody [Clone ID: 6C2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	6C2
Applications:	FC, IF
Recommended Dilution:	Flow cytometry. Immunoflourescence of fixed RAW cells: The typical starting working dilution is 1:50. Not useful for Western blot.
Reactivity:	Mouse
Host:	Rat
lsotype:	lgG2b
Clonality:	Monoclonal
Specificity:	Monoclonal antibody 6C2 reacts with mouse Toll-like receptor 2 (TLR2, CD282).
Formulation:	PBS Label: FITC State: Liquid 0.2 μm filtered lg fraction Stabilizer: 1.0% bovine serum albumin Preservative: 0.02% sodium azide
Concentration:	lot specific
Purification:	Protein G
Conjugation:	FITC
Storage:	Store at 2 - 8 °C.
Stability:	Shelf life: one year from despatch.
Gene Name:	toll-like receptor 2
Database Link:	<u>Entrez Gene 24088 Mouse</u> <u>Q9QUN7</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE Tlr2 Rat Monoclonal Antibody [Clone ID: 6C2] – AM01267FC-N

Background:Toll-like receptors (TLR) are highly conserved throughout evolution and have been implicated
in the innate defense to many pathogens. In Drosophila toll is required for the anti-fungal
response, while the related 18-wheeler is involved in antibacterial defenses. In mammals, TLR
identified as type I transmembrane signaling receptors with pattern recognition capabilities,
have been implicated in the innate host defense to pathogens. TLR2 has been identified as a
receptor that is central to the innate immune response to lipoproteins of gram-negative
bacteria, several whole gram-positive bacteria, as well as a receptor for peptidoglycan and
lipoteichoic acid and other bacterial cell membrane products. A functional interaction
between TLR2 and TLR6 in the cellular response to various bacterial products has been
discovered. The currently accepted paradigm regards TLR2 as an essential receptor for many
eubacterial cell wall components, including lipoproteins and peptidoglycan. Bacterial species
as diverse as mycobacteria, spirochetes, mycoplasma, Staphylococcus aureus, and
Streptococcus pneumoniae have all been shown to mediate cellular activation via TLR2.

Synonyms:

Toll-like receptor 2
