Product datasheet for AM03135RP-N

CD40 Mouse Monoclonal Antibody [Clone ID: HI40a]

Product data:

Product Type:	Primary Antibodies
Clone Name:	HI40a
Applications:	FC
Recommended Dilution:	Flow Cytometry analysis of human blood cells using 20 μl reagent / 100 μl of whole blood or 10e6 cells in a suspension
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human CD40a
Specificity:	This antibody recognizes CD40 (BP50), a 48 kDa type I single chain transmembrane glycoprotein expressed on normal and neoplastic B cells, but not on terminally differentiated plasma cells. CD40 antigen is also present on Hodgkin's and Reed-Sternberg cells, follicular dendritic cells, some macrophages, basal epithelial cells and endothelial cells.
Formulation:	Phosphate buffered saline (PBS) containing 15 mM sodium azide and 0.2% (w/v) high-grade protease free Bovine Serum Albumin (BSA) as a stabilizing agent Label: PE State: Liquid lg fraction Label: Conjugated with R-Phycoerythrin under optimum conditions
Purification:	Size-exclusion chromatography
Conjugation:	PE
Storage:	Store the antibody at 2 - 8 °C. DO NOT FREEZE! This product is photosensitive and should be protected from light.
Stability:	Shelf life: one year from despatch.
Gene Name:	CD40 molecule
Database Link:	<u>Entrez Gene 958 Human</u> <u>P25942</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

CD40 Mouse Monoclonal Antibody [Clone ID: HI40a] - AM03135RP-NBackground:CD40 is a costimulatory molecule of the TNF receptor superfamily and is expressed on many
cell types, such as B cells, monocytes/macrophages, dendritic cells, endothelial cells,
fibroblasts or vascular smooth muscle cells. Interaction of CD40 and its ligand CD154 (CD40L)
is required for the generation of antibody responses to T-dependent antigens as well as for
the development of germinal centers and memory B cells. In monocytes/macrophages CD40
engagement induces production of pro inflammatory cytekings and shemekings. CD40

engagement induces production of pro-inflammatory cytokines and chemokines. CD40-CD154 interactions are also critical for development of CD4 T cell-dependent effector functions. CD40 links innate and adaptive immune responses to bacterial stimuli and serves as an important regulator affecting functions of other costimulatory molecules.

Supervines	TNEDGEE CDW/AD BOED
Synonyms:	TNFRSF5, CDw40, Bp50
