

Product datasheet for **AM05431PU-S**

ACTH (POMC) (1-24) Mouse Monoclonal Antibody [Clone ID: 57 (BGN/1388/66)]

Product data:

Product Type:	Primary Antibodies
Clone Name:	57 (BGN/1388/66)
Applications:	ELISA, IHC
Recommended Dilution:	ELISA. Immunohistochemistry on Formalin Fixed Paraffin Embedded Sections: 1/100-1/200 (Requires protein digestion pre-treatment of paraffin sections e.g. trypsin or pronase).
Reactivity:	Human, Rat
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Synthetic peptide corresponding to the amino acids 1-24 of the Human ACTH conjugated to Keyhole Limpet Haemocyanin.
Specificity:	This antibody recognizes 1-24 ACTH (Synacthen) which, as a synthetic analogue of naturally-occurring Adrenocorticotrophic Hormone, can be used to measure adrenal reserve and for the diagnosis of adrenal insufficiency by acute adrenocortical stimulation. It does not recognize 17-39 ACTH (CLIP).
Formulation:	PBS, pH 7.2 State: Aff - Purified State: Liquid purified IgG fraction Preservative: 0.09% Sodium Azide
Concentration:	lot specific
Purification:	Affinity Chromatography on Protein A
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	proopiomelanocortin

Background: ACTH, released from the anterior pituitary gland in response to corticotropin-releasing hormone from the hypothalamus, acts on the adrenal cortex to stimulate the production of corticosteroids such as cortisol, involved in the response to stress. Studies have shown that the administration of 1-24 ACTH increases blood pressure, believed to be attributed to an increase in ACTH-stimulated cortisol secretion, in association with increased cardiac output.

Synonyms: Corticotropin, Adrenocorticotropic hormone, POMC
