

Product datasheet for AM05514PU-L

Itgax Hamster Monoclonal Antibody [Clone ID: N418]

Product data:

Product Type: Primary Antibodies Clone Name: N418 **Applications:** FC, IF, IHC, IP Recommended Dilution: Immunoprecipitation. Immunohistochemistry on Frozen Sections. Immunofluorescence. **Flow Cytometry:** Use 10 µl of 1/25-1/100 diluted antibody to label 16 cells in 100 µl. **Reactivity:** Mouse Host: Hamster Isotype: lgG **Clonality:** Monoclonal Immunogen: Mouse spleen dendritic cells. Specificity: This antibody recognizes the murine homologue of Human CD11c, which is a 150/90kD member of the beta 2 integrin family. In mice, CD11c is primarily expressed by dendritic cells. Clone *N418* has been reported to enhance antigen specific responses when used to target dendritic cells in vivo. Formulation: Phosphate buffered saline pH 7.4 State: Purified State: Liquid purified IgG fraction from tissue culture supernatant Stabilizer: 0.09% Sodium Azide lot specific **Concentration: Purification:** Affinity Chromatography on Protein A **Conjugation:** Unconjugated Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: integrin alpha X

	ltgax Hamster Monoclonal Antibody [Clone ID: N418] – AM05514PU-L
Database Link:	<u>Entrez Gene 16411 Mouse</u> <u>Q9QXH4</u>
Background:	CD11c (integrin alpha X chain protein) combines with the beta 2 chain (ITGB2) to form a leukocyte specific integrin referred to as inactivated C3b (iC3b) receptor 4 (CR4). The alpha X beta 2 complex seems to overlap the properties of the alpha M beta 2 integrin in the adherence of neutrophils and monocytes to stimulated endothelium cells, and in the phagocytosis of complement coated particles. The CD11c antigen is a marker for hairy cell leukaemia.
Synonyms:	ITGAX, Integrin alpha-X, Leu M5
