

Product datasheet for AM05553FC-N

CD321 / JAM1 Rat Monoclonal Antibody [Clone ID: BV12]

Product data:

Product Type: **Primary Antibodies Clone Name: BV12** ELISA, FC, IF, WB **Applications:** Recommended Dilution: Flow cytometry: The typical starting working dilution is 1:50. Immunoassays. Immunoflourescence on fixed cells. Western blot: The typical starting working dilution is 1:50. **Reactivity:** Mouse Host: Rat Isotype: lgG2a Monoclonal **Clonality:** Specificity: This antibody recognizes junctional adhesion molecule-A (JAM-A), also known as JAM-1 and the mouse platelet F11-Receptor (F11R). Formulation: PBS Label: FITC State: Liquid 0.2 µm filtered Ig fraction Stabilizer: 1% bovine serum albumin Preservative: 0.02% sodium azide **Concentration:** lot specific **Purification:** Protein G **Conjugation:** FITC Store at 2 - 8 °C. Storage: Stability: Shelf life: one year from despatch. Gene Name: F11 receptor Database Link: Entrez Gene 16456 Mouse 088792

	CD321 / JAM1 Rat Monoclonal Antibody [Clone ID: BV12] – AM05553FC-N
Background:	JAM-A is a member of the immunoglobulin superfamily found on the surface of mouse platelets and at intercellular junctions of endothelial cells and epithelial cells. JAM-A belongs together with JAM-B (VE-JAM or JAM-3) and JAM-C (JAM-2) to a family of adhesion proteins with a V-C2 immunoglobulin domain organization. JAM plays an important role in tight junctions where it is involved in cell-to-cell adhesion through homophilic interaction. It codistributes with other tight junction components as ZO-1, 7H6 antigen, cingulin and occludin. In human JAM-A plays a role in platelet aggregation, secretion, adhesion and spreading.
Synonyms:	JAM-A, Platelet F11 receptor, F11R, JCAM, PAM1
