

## Product datasheet for **AM05729PU-N**

### Hepatitis A Virus / HAV Mouse Monoclonal Antibody [Clone ID: 1881]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	1881
Applications:	ELISA, IF, IHC
Recommended Dilution:	Immunohistochemistry on paraffin sections. Immunofluorescence. ELISA.
Reactivity:	Hepatitis A Virus
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Specificity:	This antibody reacts to Hepatitis A.
Formulation:	Phosphate buffered saline containing 0.09% Sodium Azide (NaN <sub>3</sub> ) State: Purified State: Liquid purified IgG
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Background:	Hepatitis A Virus (HAV) is a 27nm nonenveloped, spherical, positive stranded RNA virus, classified within the genus hepatovirus of the picornavirus family and is among the smallest and structurally simplest of the RNA animal viruses. A single large polyprotein is expressed from a large open reading frame extending through most of the genomic RNA. This polyprotein is subsequently cleaved by a viral protease (3Cpro) to form three (possibly four) capsid proteins and several nonstructural proteins. HAV genomic replication occurs exclusively in the cytoplasm of the infected hepatocyte by a mechanism involving an RNA-dependent RNA polymerase.
