

Product datasheet for **AM08098HR-N**

Rabbit IgG Light Chain Mouse Monoclonal Antibody [Clone ID: SB62a]

Product data:

Product Type:	Primary Antibodies
Clone Name:	SB62a
Applications:	ELISA, WB
Recommended Dilution:	ELISA: 1/4,000-1/8,000.
Reactivity:	Rabbit
Host:	Mouse
Isotype:	IgG2b
Clonality:	Monoclonal
Specificity:	<p>This antibody reacts with the light chain of native Rabbit IgG primary antibodies and does not bind to the reduced and denatured Rabbit IgG heavy chain band (50 kD). By using this Mouse Anti-Rabbit Light Chain antibody, detection of antigens with molecular weights near 50 kD is not obscured by large amounts of reduced and denatured Rabbit IgG heavy chains on the blots.</p> <p>If the antigen of interest has a reduced and denatured molecular weight near 25kD, Mouse Anti-Rabbit IgG Antibody Cat.-No AM08102PU-N (clone 2A9) may be used to detect the heavy chain of the Rabbit IgG primary antibody without binding to the 25 kD band of reduced and denatured IgG Light Chains on Western Blots.</p> <p>Note: This antibody is not recommended for sensitive or quantitative detection of the reduced and denatured Rabbit Light Chains on Western Blots.</p>
Formulation:	50% Glycerol/50% PBS, pH 7.4 without preservatives Label: HRP State: Liquid purified Ig fraction Label: Horseradish Peroxidase
Conjugation:	HRP
Storage:	Store undiluted at 2-8°C for one month or in (aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
