

Product datasheet for AM08187PU-N

GSK3 beta (GSK3B) Mouse Monoclonal Antibody [Clone ID: 3A11]

Product data:

Product Type:	Primary Antibodies
Clone Name:	3A11
Applications:	ELISA, WB
Recommended Dilution:	ELISA: 1-3 μg/ml Western Blot.
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Specificity:	This antibody is specific for GSK3 beta.
Formulation:	100 mM Borate buffered saline, pH 8.2. No preservatives or amine-containing buffer salts added. State: Purified State: Liquid purified Ig fraction.
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	glycogen synthase kinase 3 beta
Database Link:	<u>Entrez Gene 2932 Human</u> <u>P49841</u>

	GSK3 beta (GSK3B) Mouse Monoclonal Antibody [Clone ID: 3A11] – AM08187PU-N
Background:	Glycogen synthase kinase 3 alpha belongs to the Ser/Thr family of protein kinases, Cdc2/cdkx subfamily; GSK3 subsubfamily. It is implicated in the hormonal control of several regulatory proteins including glycogen synthase, myb, and the transcription factor c jun. GSK3 phosphorylates glycogen synthase and thereby inactivates it. Insulin stimulates the dephosphorylation of glycogen synthase at the sites phosphorylated by GSK3 and subsequently inhibits GSK3 acutely leading to the stimulation of glycogen synthesis. GSK3 signaling is performed by two isoforms, GSK3 alpha and GSK3 beta. The two isoforms share 97% sequence similarity within their catalytic domains. GSK3 has also been shown to play a role in protein synthesis, cell adhesion, cell proliferation, cell differentiation, microtubule dynamics and cell motility.
Synonyms:	GSK-3 beta, Glycogen synthase kinase-3 beta, GSK3B
