

Product datasheet for AM09051PU-N

VAMP3 Mouse Monoclonal Antibody [Clone ID: ATG4G9]

Product data:

Product Type: Primary Antibodies Clone Name: ATG4G9 ELISA, FC, WB **Applications:** Recommended Dilution: ELISA. Western blot (1/1,000-1/2,000). Flow Cytometry. **Reactivity:** Human, Mouse Host: Mouse lgG2b Isotype: Monoclonal **Clonality:** Immunogen: Recombinant human cellubrevin (aa 1-77) purified from E. coli. Specificity: The antibody recognizes human and mouse Cellubrevin (Synaptobrevin-3 / VAMP3). Other species not tested. Formulation: PBS, pH 7.4 containing 0.02% Sodium Azide and 10% Glycerol State: Purified State: Liquid purified Ig fraction **Concentration:** lot specific **Purification:** Protein-G affinity chromatography **Conjugation:** Unconjugated Store undiluted at 2-8°C for up to two weeks or (in aliquots) at -20°C for longer. Storage: Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: vesicle associated membrane protein 3 Database Link: Entrez Gene 9341 Human <u>Q15836</u>

	VAMP3 Mouse Monoclonal Antibody [Clone ID: ATG4G9] – AM09051PU-N
Background:	Cellubrevin, also known as VAMP3, is a member of the Vamp/synaptobrevin family. Vamps, syntaxins, and the 25-kD synaptosomal-associated protein are the main components of a protein complex involved in the docking and/or fusion of synaptic vesicles with the presynaptic membrane. Cellubrevin is a vesicular soluble N-ethylmaleimide sensitive factor attachment protein receptor (v-SNARE) homologous to the neuronal synaptobrevins 1/2 and is also a substrate of tetanus neurotoxin.
Synonyms:	VAMP3, Vesicle-associated membrane protein 3, SYB3, Cellubrevin, CEB

10 -

The extracts of mouse lung tissue (40ug) were resolved by SDS-PAGE, transferred to NC membrane and probed with anti-human Cellubrevin (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system
