

Product datasheet for **AM09297PU-N**

CREB1 pSer133 Mouse Monoclonal Antibody [Clone ID: A3A4]

Product data:

Product Type:	Primary Antibodies
Clone Name:	A3A4
Applications:	ELISA
Recommended Dilution:	Indirect ELISA: The antibody is reactive to serine133 phosphorylated Human CREB peptide and reactive to Serine133 phosphorylated human CREB peptide conjugated with KLH or BSA. The suggested antigen coating quantity is 1 µg/ml of peptide/or peptide conjugating in pH 9.5 carbonate buffer, 100 µl/well.
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Peptide of a phosphorylated fragment of CREB [pSer133], conjugated with KLH
Specificity:	Reactive to Serine133 phosphorylated Human CREB peptide fragment, and reactive to KLH or BSA conjugated Serine133 phosphorylated Human CREB peptide fragment.
Formulation:	0.01 M PBS, pH 7.0 without preservatives State: Aff - Purified State: Lyophilized purified IgG fraction.
Reconstitution Method:	Restore with Double distilled water to adjust the final concentration to 1.0 mg/ml.
Purification:	Affinity Chromatography on Protein G
Conjugation:	Unconjugated
Storage:	Upon receipt, store (in aliquots) at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	cAMP responsive element binding protein 1
Database Link:	Entrez Gene 1385 Human P16220

Background:	Transcription factor CREB binds the cAMP response element (CRE) and activates transcription in response to a variety of extracellular signals including neurotransmitters, hormones, membrane depolarization, and growth or neurotrophic factors. Protein kinase A and the calmodulin-dependent protein kinase CaMKII stimulate CREB phosphorylation at Ser133, a key regulatory site controlling transcriptional activity. Phosphorylation at Ser133 is also mediated by p44/42 MAP kinase, p90RSK, p38 MAP kinase and MSK1. CREB appears to play an important role in learning and memory in both flies and mice.
Synonyms:	CREB-1
Protein Families:	Druggable Genome, Transcription Factors
Protein Pathways:	Antigen processing and presentation, Huntington's disease, Melanogenesis, Prostate cancer
