

Product datasheet for **AM09316PU-N**

ELK1 pSer383 Mouse Monoclonal Antibody [Clone ID: D7H2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	D7H2
Applications:	ELISA
Recommended Dilution:	Indirect ELISA: the antibody is reactive to the un-conjugated Serine383 phosphorylated human ELK-1 peptide, and reactive to the serine383 phosphorylated human ELK-1 peptide conjugated with KLH or the peptide-BSA conjugate. The suggested antigen Coating quantity is 1 µg/ml of peptide/or peptide conjugating in pH 9.5 carbonate buffer, 100 µl/well.
Reactivity:	Human
Host:	Mouse
Isotype:	IgG2b
Clonality:	Monoclonal
Immunogen:	Peptide of a phosphorylated fragment of ELK1 (pSer383) conjugated with KLH.
Specificity:	Reactive to the un-conjugated serine383 phosphorylated Human ELK-1 peptide fragment, and reactive to the Serine383 phosphorylated Human ELK-1 peptide fragment conjugated to KLH or the peptide- BSA conjugate. Not reactive to KLH or BSA.
Formulation:	0.01M PBS, pH 7.0 without preservatives State: Aff - Purified State: Lyophilized purified IgG fraction
Reconstitution Method:	Restore with Double distilled water to adjust the final concentration to 1.0 mg/ml.
Purification:	Affinity Chromatography on Protein G
Conjugation:	Unconjugated
Storage:	Upon receipt, store (in aliquots) at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	ELK1, ETS transcription factor
Database Link:	Entrez Gene 2002 Human P19419

Background:	ELK1 belongs to the EST transcription factor family. Proteins in the family have a unique DNA binding domain that binds to conserved DNA sequences. Phosphorylation of ELK1 at serine 383 and 389 by mitogen-activated protein kinases (MAPKs) activates ELK1. The binding of ELK1 to target sequences is also regulated by its co-factor, serum response factor (SRF), by alternative splicing, and by SUMOylation. ELK1 regulates the transcription of c-fos and genes encoding cytoskeleton proteins, and was found to play a role in longterm memory formation, drug addiction and other neurological disorders.
Synonyms:	Elk-1
Protein Families:	Druggable Genome, Transcription Factors
Protein Pathways:	Endometrial cancer, ErbB signaling pathway, Focal adhesion, GnRH signaling pathway, Insulin signaling pathway, MAPK signaling pathway, Prion diseases
