

Product datasheet for **AM12006PU-N**

CD28 Mouse Monoclonal Antibody [Clone ID: CD28.2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	CD28.2
Applications:	FC, FN, IF, IHC, IP, WB
Recommended Dilution:	Flow cytometry. Immunoprecipitation. Western blot. Immunohistochemistry (frozen sections). Immunocytochemistry. Functional application: T cell costimulation.
Reactivity:	Human, Primate
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	DC28.1.3.3 murine T cell hybridoma transfected with human CD28 cDNA
Specificity:	This antibody reacts with CD28, a disulfide-linked homodimeric type I glycoprotein (monomer of Mw 44 kDa) which is a critical costimulatory receptor of T cells.
Formulation:	Phosphate buffered saline (PBS) with 15 mM sodium azide, approx. pH 7.4 State: Purified State: Liquid Ig fraction
Concentration:	lot specific
Purification:	Protein A affinity chromatography; purity > 95% (by SDS-PAGE)
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C. DO NOT FREEZE!
Stability:	Shelf life: one year from despatch.
Gene Name:	CD28 molecule
Database Link:	Entrez Gene 940 Human P10747

Background:

CD28 is the critical T cell costimulatory receptor which provides to the cell the important second activation signal by binding CD80 and CD86 that are expressed by antigen presenting cells. Besides its costimulation role CD28 functions in preventing T cells from anergic hypo-responsive state or from undergoing premature apoptotic cell death. CD28 is also expressed on human fetal NK cells and some NK cell lines, whereas on murine NK cells the CD28 expression is much broader.

Synonyms:

TP44

Protein Families:

Druggable Genome, Transmembrane

Protein Pathways:

Allograft rejection, Autoimmune thyroid disease, Cell adhesion molecules (CAMs), Graft-versus-host disease, Systemic lupus erythematosus, T cell receptor signaling pathway, Type I diabetes mellitus, Viral myocarditis
