

# Product datasheet for AM20459SU-N

## PEG10 Mouse Monoclonal Antibody [Clone ID: 4C10A7]

### **Product data:**

### **Product Type: Primary Antibodies Clone Name:** 4C10A7 **Applications:** ELISA, IHC, WB Recommended Dilution: ELISA: 1/10000. Immunohistochemistry on Paraffin Sections: 1/200. Western Blot: 1/500 - 1/2000. **Reactivity:** Human Host: Mouse Isotype: lgG1 Monoclonal **Clonality:** Immunogen: Recombinant Human PEG10 protein Specificity: Recognizes Paternally Expressed 10 (PEG10). Formulation: State: Ascites State: Ascites fluid containing 0.03% Sodium Azide as preservative **Conjugation:** Unconjugated Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Storage: Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: paternally expressed 10 Database Link: Entrez Gene 23089 Human Q86TG7

Background:This gene includes two overlapping reading frames of the same transcript encoding distinct<br/>isoforms. The shorter isoform has a CCHC-type zinc finger motif containing a sequence<br/>characteristic of gag proteins of most retroviruses and some retrotransposons, and it<br/>functions in part by interacting with members of the TGF-beta receptor family. The longer<br/>isoform has the active-site DSG consensus sequence of the protease domain of pol proteins.<br/>The longer isoform is the result of -1 translational frame shifting that is also seen in some<br/>retroviruses. Expression of these two isoforms only comes from the paternal allele due to<br/>imprinting. Increased gene expression (as observed by an increase in mRNA levels) is<br/>associated with hepatocellular carcinomas.

### Synonyms: EDR, KIAA1051, MAR2, MART2, MEF3L1, MEF3-like protein 1, RGAG3
