Product Type:	Primary Antibodies
Clone Name:	АК4
Applications:	FC, FN, IF, IP, WB
Recommended Dilution:	Flow cytometry: 1.5 μg/ml. Immunoprecipitation. Western blot. Immunocytochemistry. Functional application: Blocking.
Reactivity:	Human, Primate
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human platelets
Specificity:	This antibody recognizes CD62P (P-selectin), a 140 kD single chain type I transmembrane glycoprotein present in secretory alpha-granules in platelets, in Weibel-Palade bodies in endothelial cells and in megakaryocytes; it is relocated to the plasma membrane upon activation.
Formulation:	Phosphate buffered saline (PBS) State: Aff - Purified State: Liquid lg fraction Preservative: 15 mM sodium azide, approx. pH 7.4
Concentration:	lot specific
Purification:	Protein-A affinity chromatography
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	selectin P

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	CD62P (SELP) Mouse Monoclonal Antibody [Clone ID: AK4] – AM26020PU-N
Database Link:	<u>Entrez Gene 6403 Human</u> <u>P16109</u>
Background:	CD62P (P-selectin) is an adhesion glycoprotein that is expressed on platelets and endothelial cells upon their activation. Interaction between CD62P and its mucin-like ligand PSGL-1 (P- selectin glycoprotein ligand-1) expressed on the microvilli of most leukocytes supports leukocyte rolling along postkapillary venules at the earliest time of inflammation. Both CD62P and PSGL-1 are extended glycoproteins that form homodimers. CD62P dimerization is probably mediated through interactions of the transmembrane domains and stabilizes leukocyte tethering and rolling, probably by increasing rebinding within a bond cluster.
Synonyms:	SELP, GMRP, GRMP, PADGEM, GMP-140, LECAM3
