## FLT3 Mouse Monoclonal Antibody [Clone ID: BV10A4]

**Product data:** 

**Product Type:** Primary Antibodies

Clone Name: BV10A4

Applications: FC

Recommended Dilution: Flow cytometry analysis of human blood cells using 4 µl reagent / 100 µl of whole blood or

106 cells in a suspension.

The content of a vial (0.4 ml) is sufficient for 100 tests.

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

**Immunogen:** BV-173 leukemic cell line

Specificity: This antibody reacts with CD135 (FLT3, FLK2, STK-1), a 130-160 kDa type III receptor tyrosine

kinase that is involved in early steps of hematopoiesis.

**Formulation:** Phosphate buffered saline (PBS)

Label: FITC

State: Liquid purified Ig fraction

Stabilizer: 0.2% (w/v) high-grade protease free Bovine Serum Albumin (BSA)

Preservative: 15 mM sodium azide

Label: Conjugated with Fluorescein isothiocyanate (FITC) under optimum conditions. The

reagent is free of unconjugated FITC and adjusted for direct use.

Conjugation: FITC

**Storage:** Prior to and following reconstitution store the antibody at 2-8°C.

DO NOT FREEZE!

This product is photosensitive and should be protected from light.

**Stability:** Shelf life: one year from despatch.

**Gene Name:** fms related tyrosine kinase 3

**Database Link:** Entrez Gene 2322 Human

P36888

## FLT3 Mouse Monoclonal Antibody [Clone ID: BV10A4] - AM26022FC-N

Background: CD135 / FLT3, also known as FLK2 or STK-1 is a receptor tyrosine kinase that plays important

roles in hematopoiesis. After binding of Flt3 ligand (FL), CD135 homodimerizes and stimulates proliferation, differentiation and protects the cell from apoptosis. The loss of CD90 and gain of CD135 expression marks the loss of self-renewal in hematopoietic stem cell population. Detectable CD135 expression appears first at low levels on the surface of primitive multilineage progenitor cells and disappears during defined stages of B-cell development, but is upregulated and maintained during maturation of monocytes. CD135 is also expressed

on thymocytes, dendritic cell progenitors and on mature dendritic cells, as well as on various

malignant hematopoietic cells.

**Synonyms:** FL cytokine receptor, STK1
