# Product datasheet for AM26029RP-N

## Cd4 Rat Monoclonal Antibody [Clone ID: GK1.5]

#### **Product data:**

| Product Type:         | Primary Antibodies  |
|-----------------------|---|
| Clone Name:           | GK1.5   |
| Applications:         | FC  |
| Recommended Dilution: | Flow cytometry: 3 µg/ml.  |
| Reactivity:           | Mouse   |
| Host:                 | Rat   |
| lsotype:              | lgG2b   |
| Clonality:            | Monoclonal  |
| Immunogen:            | Mouse CTL clone V4 cells  |
| Specificity:          | This antibody reacts with an extracellular epitope of mouse CD4 transmembrane<br>glycoprotein (55 kDa).   |
| Formulation:          | PBS, approx. pH 7.4<br>Label: PE<br>State: Liquid purified Ig fraction<br>Preservative: 15 mM sodium azide<br>Label: Conjugated with R-Phycoerythrin under optimum conditions. The conjugate is purified<br>by size-exclusion chromatography. |
| Concentration:        | lot specific  |
| Conjugation:          | PE  |
| Storage:              | Store the antibody at 2 - 8 °C. DO NOT FREEZE! This product is photosensitive and should be protected from light.   |
| Stability:            | Shelf life: one year from despatch.   |
| Gene Name:            | CD4 antigen   |
| Database Link:        | <u>Entrez Gene 12504 Mouse</u><br><u>P06332</u>   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

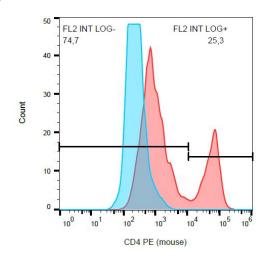

#### Cd4 Rat Monoclonal Antibody [Clone ID: GK1.5] – AM26029RP-N

Background:CD4 is a single chain transmembrane glycoprotein of immunoglobulin supergene family. In<br/>its extracellular region there are 4 immunoglobulin-like domains (1 Ig-like V-type and 3 Ig-like<br/>C2-type). The intracellular region of CD4 associates with p56Lck, a Src-like protein tyrosine<br/>kinase. It was described that CD4 segregates into specific detergent-resistant T-cell<br/>membrane microdomains. CD4 binds to MHC class II molecules (by CDR2-like region in CD4<br/>domain 1), HIV envelope protein gp120 (by CDR2-like region in CD4 domain 1) and other<br/>ligands, such as IL-16 (by to CD4 domain 3) or L-selectin. CD4 is a co-receptor involved in<br/>immune response (co-receptor activity in binding to MHC class II molecules) and HIV<br/>infection. CD4 regulates T-cell activation, T/B-cell adhesion, T-cell diferentiation, T-cell<br/>selection and signal transduction. Defects in antigen presentation (MHC class II) cause<br/>dysfunction of CD4+ T-cells and their almost complete absence in patients blood, tissue and<br/>organs (SCID immunodeficiency).

Synonyms:

T-cell surface antigen T4/Leu-3
