CD34 Mouse Monoclonal Antibody [Clone ID: QBEnd-10]

Product data:

Product Type: Primary Antibodies

Clone Name: QBEnd-10

Applications: FC

Recommended Dilution: Flow Cytometry analysis of human blood cells using 20 μl reagent / 100 μl of whole blood

or 106 cells in a suspension.

The content of a vial (2 ml) is sufficient for 100 tests.

Reactivity: Human, Primate

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human endothelial vesicles

Specificity: This antibody reacts with Class II epitope on CD34 (Mucosialin), a 110-115 kDa monomeric

transmembrane phosphoglycoprotein expressed on hematopoietic progenitors cells and on the most pluripotential stem cells; it is gradually lost on progenitor cells. This antibody has

been also used as an endothelial marker.

Formulation: Phosphate buffered saline (PBS) solution containing 15mM sodium azide

Label: PE

State: Liquid purified Ig fraction

Label: Conjugated with R-Phycoerythrin under optimum conditions. The conjugate is purified

by size-exclusion chromatography and adjusted for direct use.

Conjugation: PE

Storage: Store the antibody at 2 - 8 °C. DO NOT FREEZE! This product is photosensitive and should be

protected from light.

Stability: Shelf life: one year from despatch.

Gene Name: CD34 molecule

Database Link: Entrez Gene 947 Human

P28906

CD34 Mouse Monoclonal Antibody [Clone ID: QBEnd-10] - AM26038RP-N

Background: CD34 is a highly glycosylated monomeric 111-115 kDa surface protein, which is present on

many stem cell populations. It is a well established stem cell marker, though its expression on human hematopoietic stem cells is reversible. CD34 probably serves as a surface receptor that undergoes receptor-mediated endocytosis and regulates adhesion, differentiation and proliferation of hematopoietic stem cells and other progenitors. CD34 expression is likely to represent a specific state of hematopoietic development that may have altered adhering properties with expanding and differentiating capabilities in both in vitro and in vivo

conditions.

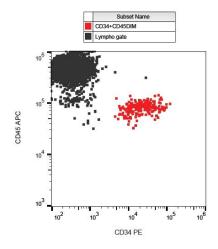

Synonyms: Hematopoietic progenitor cell marker

Protein Families: Adult stem cells, Cancer stem cells, Druggable Genome, Embryonic stem cells, ES Cell

Differentiation/IPS, Transmembrane

Protein Pathways: Cell adhesion molecules (CAMs), Hematopoietic cell lineage
