

Product datasheet for AM26059PU-N

Cr1l Mouse Monoclonal Antibody [Clone ID: 512]

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Clone Name:	512
Applications:	FC, IHC
Recommended Dilution:	Immunohistochemistry on frozen sections: 0.1 μg/ml (1:4000). Does not react on routinely processed paraffin sections. Has been reported to work in FACS. Suggested positive control: rat spleen.
Reactivity:	Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Erythrocytes from a C3 mutated rat
Specificity:	This antibody detects Crry. The antigen is found on numerous cells in blood and various tissues.
Formulation:	Stock solution contains 0.4 mg/ml lgG, phosphate buffered saline pH 7.2 (PBS), 5mg/ml bovine serum albumin (BSA) as a stabilizer and 0.09% sodium azide as a preservative. State: Aff - Purified State: Liquiphilized lg fraction
Reconstitution Method:	Reconstitute by adding 0.5 ml distilled water.
Purification:	Affinity chromatography
Conjugation:	Unconjugated
Storage:	Prior to reconstitution store at 2-8°C. Following reconstitution store (in aliquots) at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	complement component (3b/4b) receptor 1-like
Database Link:	<u>Entrez Gene 54243 Rat</u> <u>Q63135</u>

	Cr1l Mouse Monoclonal Antibody [Clone ID: 512] – AM26059PU-N
Background:	Crry is a cofactor for complement factor I. Crry seems to act as a costimulatory factor for T-cells and is expressed on different tissues, particularly also on thymocytes and non-lymphoid cells in the thymus. Crry may play an important role in the early embryonic development by maintaining fetomaternal tolerance. Two forms of Crry exist, containing six or seven extracellular short consensus repeats (SCRs), respectively, plus a transmembrane and a cytoplasmic domain. The molecular weights of the native glycoproteins are approximately 55 and 65kDa, respectively.
Synonyms:	Antigen 5I2
