Product datasheet for AM26106PU-N

BPV-1 Protein E2 (310-410) Mouse Monoclonal Antibody [Clone ID: 5H4]

Product data:

Product Type:	Primary Antibodies
Clone Name:	5H4
Applications:	ELISA, FN, IF
Recommended Dilution:	Immunoflourescence. ELISA. Functional application: specifically dissociates E2 protein from DNA (Kurg et al, 1999). This is a conformational antibody and does not work in Western immunoblotting analysis or in other denaturative conditions.
Reactivity:	Bovine
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Specificity:	This antibody detects Bovine Papillomavirus E2-protein, mapped to amino acids 310-410.
Formulation:	PBS with 50% glycerol State: Aff - Purified State: Liquid lg fraction
Concentration:	lot specific
Purification:	Protein A affinity chromatography
Conjugation:	Unconjugated
Storage:	Upon receipt, store (in aliquots) at -20 to -70 °C. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Database Link:	<u>P03122</u>
Background:	The bovine papilloma virus E2 protein is the master regulator of papillomavirus replication and transcription. Binds to the E2RE response element (5'-ACCNNNNNNGGT-3') present in multiple copies in the regulatory region. Can either activate or repress transcription depending on E2RE's position with regards to proximal promoter elements. Repression occurs by sterically hindering the assembly of the transcription initiation complex. The E1-E2 complex binds to the origin of DNA replication.
