Human Lambda Light Chain Mouse Monoclonal Antibody [Clone ID: 1-155-2]

Product data:

Product Type: Primary Antibodies

Clone Name: 1-155-2

Applications: FC

Recommended Dilution: Flow Cytometry analysis of human blood cells using 10 μl reagent / 100 μl of whole blood

or 10e6 cells in a suspension.

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human IgA1 lambda myeloma protein

Specificity: This antibody recognizes lambda light chains (22.5 kDa) of human immunoglobulin.

Formulation: Phosphate buffered saline (PBS) containing 15 mM sodium azide

Label: PE

State: Liquid purified Ig fraction

Label: Conjugated with R-Phycoerythrin under optimum conditions. The conjugate is purified

by size-exclusion chromatography and adjusted for direct use.

Conjugation: PE

Storage: Store the antibody at 2 - 8 °C. DO NOT FREEZE! This product is photosensitive and should be

protected from light.

Stability: Shelf life: one year from despatch.

Background: Immunoglobulin classes share the same basic four polypeptide chain structure of two heavy

chains (five heavy chains types) and two light chains (kappa, lambda; both having a molecular weight of 22.5kDa). Kappa and lambda consist of a variable region and a constant region and can easily be differentiated by the antigenic properties of the constant region. The ratio of

kappa to lambda is 70:30.
