Product datasheet for AM26163PU-N

Myeloperoxidase (MPO) Mouse Monoclonal Antibody [Clone ID: 2D4]

Product data:

Product Type:	Primary Antibodies
Clone Name:	2D4
Applications:	ELISA, IF, IHC
Recommended Dilution:	 Immunoassay. Immunoflourescence. Flow Cytometry (starting working dilution is 1/50). Immunohistochemistry on Frozen Sections (starting working dilution is 1/50). The antibody isnot useful for Western blotting, Immunopurification and Immunohistochemistry on Paraffin Embedded Sections.
Reactivity:	Mouse, Rat
Host:	Mouse
lsotype:	IgG1
Clonality:	Monoclonal
Specificity:	This monoclonal antibody 2D4 recognizes Rat Myeloperoxidase (MPO). Cross reacts with Mouse MPO.
Formulation:	PBS State: Purified State: Liquid 0.2 μm filtered purified Ig fraction Stabilizer: 0.1% BSA Preservative: 0.02% Sodium Azide
Concentration:	lot specific
Purification:	Protein G Chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C.
Stability:	Shelf life: one year from despatch.
Gene Name:	myeloperoxidase
Database Link:	<u>P05164</u>

	Myeloperoxidase (MPO) Mouse Monoclonal Antibody [Clone ID: 2D4] – AM26163PU-N
Background:	MPO is a glycoprotein with an alpha2beta2 heteromultimer expressed in all cells of the myeloid linage. MPO is abundantly present in azurophilic granules of polymorphonuclear neutrophils. It is an important enzyme used during phagocytic lysis of engulfed foreign particles which takes part in the defense of the organism through production of hypochlorous acid (HOCI), a potent oxidant. MPO is rapidly released by activated polymorphonuclear neutrophils. Involvement of MPO has been described in numerous diseases such as atherosclerosis, lung cancer, Alzheimer's disease and multiple sclerosis. Autoimmune antibodies to MPO are involved in Wegeners disease. Since the discovery of MPO deficiency, initially regarded as rare and restricted to patients suffering from severe infections, MPO has more attracted clinical attention. In experimental studies antibodies to MPO can be used for various purposes ranging from flow cytometric analysis to detection of polymorphonuclear neutrophils in tissue sections.
Synonyms:	MPO
