IL1 beta (IL1B) Mouse Monoclonal Antibody [Clone ID: 464]

Product data:

Host:

Product Type: Primary Antibodies

Clone Name: 464
Applications: ELISA
Recommended Dilution: ELISA.
Reactivity: Human

Isotype: IgG1

Clonality: Monoclonal

Immunogen: Purified recombinant human IL-1β

Mouse

Specificity: Reactive with natural and recombinant human IL-1β

Formulation: 0.01M PBS, pH 7.2

State: Aff - Purified

State: Lyophilized Ig fraction

Reconstitution Method: Double distillated water is recommended to adjust the final concentration to 1.00 mg/ml.

Purification: Protein G affinity purified

Conjugation: Unconjugated

Storage: Store (in aliquots) at -20 °C. Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Gene Name: interleukin 1 beta

Database Link: Entrez Gene 3553 Human

P01584

Background: Interleukin 1 (IL1), originally known as lymphocyte activating factor (LAF), activates T cells and

lymphocytes, which then proliferate and secrete interleukin 2. IL1 is primarily released from stimulated macrophages and monocytes, but also is released from several other cell types, and is thought to play a key role in inflammatory and immune responses. The two closely related agents, interleukin1 alpha (IL1 alpha) and interleukin1 beta (IL1 beta) bind to the

same cell surface receptor, elicit nearly identical biological responses and share

25% homology in their amino acid sequence.

Synonyms:

IL-1 beta, IL1B, IL1 beta, IL1F2, Catabolin
