## CD79A (208-222) Mouse Monoclonal Antibody [Clone ID: HM47]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: HM47
Applications: FC

Recommended Dilution: Flow cytometry analysis of human blood cells using 10 μl reagent / 100 μl of whole blood or

106 cells in a suspension.

The content of a vial (1 ml) is sufficient for 100 tests.

**Reactivity:** Bovine, Canine, Chicken, Equine, Guinea Pig, Human, Mouse, Porcine, Primate, Rabbit, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

**Immunogen:** Synthetic peptide corresponding to C terminal amino acids 208-222 of human CD79a

**Specificity:** This antibody reacts with intracellular domain of CD79a (Ig alpha), a 40-45 kDa subunit of B

cell antigen-specific receptor (BCR) and its early developmental forms.

**Formulation:** Phosphate buffered saline (PBS)

Label: PE

State: Liquid Ig fraction

Preservative: 15 mM sodium azide

Conjugation: PE

**Storage:** Store the antibody undiluted at 2-8°C.

DO NOT FREEZE!

This product is photosensitive and should be protected from light.

**Stability:** Shelf life: one year from despatch.

**Gene Name:** CD79a molecule

Database Link: Entrez Gene 973 Human

P11912

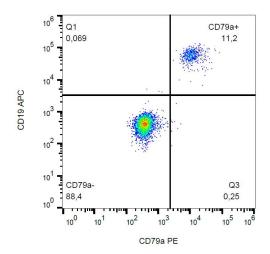

Background:

CD79a (Ig alpha, MB1) forms disulfide-linked heterodimer with CD79b (Ig beta). They both are transmembrane proteins with extended cytoplasmic domains containing immunoreceptor tyrosine activation motives (ITAMs), and together with cell surface immunoglobulin they constitute B-cell antigen-specific receptor (BCR). CD79a and b are the first components of BCR that are expressed developmentally. They appear on pro-B cells in association with the endoplasmic reticulum chaperone calnexin. Subsequently, in pre-B cells, CD79 heterodimer is associated with lambda5-VpreB surrogate immunoglobulin and later with antigen-specific surface immunoglobulins. At the plasma cell stage, CD79a is present as an intracellular component. CD79a/b complex interacts with Src-family tyrosine kinase Lyn, which phosphorylates its cytoplasmic ITAM motives to form docking sites for downstream signaling.

Synonyms:

IGA, MB1, B-Cell marker
