| | TNFSF12-TNFSF13 Mouse Monoclonal Antibody [Clone ID: CARL-1] – AM26783LE-N |
|-------------|--|
| Background: | CD255 / TWEAK (TNF-related weak inducer of apoptosis), a type II transmembrane protein expressed as membrane-bound and secreted form, can induce apoptosis in many tissues and cell lines through its receptor CD266 / TWEAK R. On the other hand, in endothelial cells this interaction can induce proliferation and promote angiogenesis including neovascularization of tumours. CD255 can act in a juxtacrine manner to initiate cellular responses, and induces secretion of pro-inflammatory cytokines. Besides CD266, CD255 may also bind to DR3. |
| Synonyms: | APO3 ligand, APO3L, DR3LG |
