|                  | DLX2 Mouse Monoclonal Antibody [Clone ID: 2E12] – AM31163PU-N  |
|------------------|--|
| Background:      | Many vertebrate homeo box-containing genes have been identified on the basis of their<br>sequence similarity with Drosophila developmental genes. Members of the Dlx gene family<br>contain a homeobox that is related to that of Distal-less (Dll), a gene expressed in the head<br>and limbs of the developing fruit fly. The Distal-less (Dlx) family of genes comprises at least 6<br>different members, DLX1-DLX6. The DLX proteins are postulated to play a role in forebrain<br>and craniofacial development. |
| Synonyms:        | DLX-2, Homeobox protein DLX2   |
| Protein Families | ES Cell Differentiation/IPS, Stem cell relevant signaling - TGFb/BMP signaling pathway, Transcription Factors  |
