

Product datasheet for **AM31847BT-N**

Factor VII (F7) (+VIIa) Mouse Monoclonal Antibody [Clone ID: AA-3]

Product data:

Product Type:	Primary Antibodies
Clone Name:	AA-3
Applications:	ELISA, WB
Recommended Dilution:	ELISA. Western Blot.
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Human Factor VII (AA-3) purified from plasma.
Specificity:	This antibody is specific for factor VII/VIIa (AA-3).
Formulation:	PBS Label: Biotin State: Liquid purified IgG fraction Stabilizer: EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/ml Preservative: 0.02% Sodium Azide
Concentration:	lot specific
Conjugation:	Biotin
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	coagulation factor VII
Database Link:	Entrez Gene 2155 Human P08709

Background:	Human blood coagulation factor VII is a 50 kD, vitamin K dependent, plasma glycoprotein synthesized in the liver and secreted into the blood as a single chain zymogen of serine protease factor VIIa. Factor VII participates in a cascade of reactions leading to the coagulation of blood and contains two Epidermal Growth Factor (EGF) domains. This antibody recognizes an epitope in the first EGF-like domain of factor VII/VIIa. Factor VII participates in the extrinsic pathway of blood coagulation in an Activated form called factor VIIa. Factor VII can be converted to VIIa by Factor IXa or thrombin.
Synonyms:	Proconvertin, SPCA
Protein Families:	Druggable Genome, Protease
Protein Pathways:	Complement and coagulation cascades
