

Product datasheet for **AM31881RP-N**

Pdcd1 Hamster Monoclonal Antibody [Clone ID: J43]

Product data:

Product Type:	Primary Antibodies
Clone Name:	J43
Applications:	FC
Recommended Dilution:	Flow Cytometry.
Reactivity:	Mouse
Host:	Hamster
Isotype:	IgG
Clonality:	Monoclonal
Immunogen:	PD-1 cDNA transfectant. Donor: mouse ascites fluid. Fusion Partner: Mouse myeloma P3U1.
Specificity:	This Monoclonal Antibody reacts with Mouse PD-1 (Programmed Death-1).
Formulation:	PBS containing 0.02% Sodium Azide as preservative and EIA grade BSA as a stabilizing protein to bring total protein concentration to 4-5 mg/mL. Label: PE State: Liquid purified IgG fraction Label: R - Phycoerythrin
Concentration:	lot specific
Purification:	Protein G Chromatography
Conjugation:	PE
Storage:	Store the antibody undiluted at 2-8°C. DO NOT FREEZE!
Stability:	Shelf life: one year from despatch.
Gene Name:	programmed cell death 1
Database Link:	Entrez Gene 18566 Mouse Q02242

Background:

CD279 is 50-55kD membrane protein which is a member of the CD28 family, and functions mainly as a negative regulator of T-cell activation. CD279 has two specific ligands; CD274 (PD-L1) and CD273 (PD-L2), and their interaction is key in the balance between stimulatory and inhibitory signals needed for effective immune responses to microbes and self-tolerance. CD279 is inducibly expressed by T-cells, B-cells, NK-T-cells and monocytes upon activation. Loss of CD279 function has been associated with a number of autoimmune diseases, including rheumatoid arthritis, type I diabetes and ankylosing spondylitis. Recent studies suggest that CD279 could be targeted therapeutically in the treatment of HIV infection to reduce T-cell exhaustion.

Synonyms:

Protein PD-1, hPD-1, PDCD1

Note:

TEST RESULTS (Figure 1.)

Tissue Distribution by Flow Cytometry Analysis:

Mouse Strain: Balb/c

Antibody Concentration Used: 2.0 µg/10e6 cells.

Isotypic Control (shaded): Purified Hamster IgG.
