

Product datasheet for **AM32281PU-N**

CD71 (TFRC) Mouse Monoclonal Antibody [Clone ID: 3B8 2A1]

Product data:

Product Type:	Primary Antibodies
Clone Name:	3B8 2A1
Applications:	ELISA, IHC, IP, WB
Recommended Dilution:	ELISA. Flow Cytometry. Immunoassay. Western Blot. Immunoprecipitation. Immunohistochemistry on frozen sections. The typical starting working dilution is 1/10.
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Specificity:	This antibody reacts to Transferrin Receptor 1.
Formulation:	PBS State: Purified State: Liquid purified Ig fraction Stabilizer: 0,1% BSA Preservative: 0.02% sodium azide
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C.
Stability:	Shelf life: one year from despatch.
Gene Name:	transferrin receptor
Database Link:	Entrez Gene 7037 Human P02786

Background:

Human transferrin receptor 1 (TfR1), also designated CD71, is a homodimeric type II membrane glycoprotein of 90-95 kDa. This receptor binds two molecules of the serum iron-transport protein transferrin (Tf) and is internalised into endosomes that are acidified, resulting in the release of iron from Tf. TfR1 is not expressed on resting leukocytes but is upregulated on all proliferating cells upon activation, reflecting the iron dependence of proliferation. In tissues TfR1 is expressed on most dividing cells and on brain capillary endothelium. Expression of TfR1 is down regulated as a result of iron overload. TfR1 shares 45% identity with TfR2.

Synonyms:

TfR1, p90, Transferrin receptor protein 1
