Product datasheet for AM50053PU-S

MFAP4 Mouse Monoclonal Antibody [Clone ID: AT12D11]

Product data:

Product Type:	Primary Antibodies	
Clone Name:	AT12D11	
Applications:	ELISA, WB	
Recommended Dilution:	The antibody has been tested by ELISA, Western blot analysis to assure specificity and reactivity. Since application varies, however, each investigation should be titrated by the reagent to obtain optimal results. Recommended starting dilution is 1:1000.	
Reactivity:	Human	
Host:	Mouse	
lsotype:	IgG1	
Clonality:	Monoclonal	
Immunogen:	Recombinant human MFAP4 (22-255aa) purified from E. coli	
Formulation:	PBS, pH 7.4 containing 0.02% Sodium Azide and 10% Glycerol State: Purified State: Liquid purified Ig fraction	
Concentration:	lot specific	
Purification:	Protein-A affinity chromatography	
Conjugation:	Unconjugated	
Storage:	Store undiluted at 2-8°C for up to two weeks or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.	
Stability:	Shelf life: one year from despatch.	
Gene Name:	microfibrillar associated protein 4	
Database Link:	<u>Entrez Gene 4239 Human</u> <u>P55083</u>	

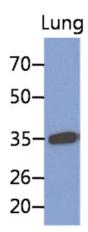

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	MFAP4 Mouse Monoclonal Antibody [Clone ID: AT12D11] – AM50053PU-S
Background:	Several microfibril associated proteins (MFAPs) have been cloned, including MFAP1, MFAP3 and MFAP4. The MFAP1 and MFAP3 genes are localized near the fibrillin genes FBN1 and FBN2, respectively. Mutations in FBN1 are linked to Marfan syndrome. Mutations in FBN2 have been linked to congenital contractural arachnodactyly. This suggests roles for MFAP1 and MFAP3 in heritable diseases affecting microfibrils. Deletion of MFAP4 was found in 30 of 31 patients with Smith-Magenis syndrome (SMS), a clinically recognizable multiple congenital anomaly/mental retardation syndrome. Also, MFAP4 play an important role in calcium- dependent cell adhesion or intercellular interactions. These structural features of MFAP4 suggest that it is an extracellular matrix protein involved in cell adhesion or intercellular interactions.

Synonyms:	Microfibril-associated glycoprotein 4
Protein Families:	Druggable Genome, Secreted Protein

Product images:

The extract of lung (30ug) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human MFAP4 antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.
