## FABP9 Mouse Monoclonal Antibody [Clone ID: AT13F9]

**Product data:** 

**Product Type:** Primary Antibodies

Clone Name: AT13F9

**Applications:** ELISA, WB

Recommended Dilution: ELISA.

Western blot.

Recommended Starting Dilutions: 1/1000.

Reactivity: Human
Host: Mouse

**Isotype:** lgG1

Clonality: Monoclonal

Immunogen: Recombinant human FABP9 (1-132aa) purified from E. coli.

**Specificity:** This antibody recognizes Human FABP9. Other species not tested.

**Formulation:** PBS, pH 7.4 containing 0.02% Sodium Azide and 10% Glycerol

State: Purified

State: Liquid purified Ig fraction

**Concentration:** lot specific

**Purification:** Affinity Chromatography on Protein A

**Conjugation:** Unconjugated

Storage: Store undiluted at 2-8°C for up to two weeks or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

**Stability:** Shelf life: one year from despatch.

**Gene Name:** fatty acid binding protein 9

Database Link: Entrez Gene 646480 Human

Q0Z7S8

### FABP9 Mouse Monoclonal Antibody [Clone ID: AT13F9] - AM50091PU-S

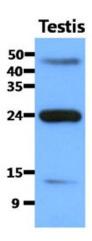

#### Background:

FABP9, also known as fatty acid binding protein 9, is a 132 amino acid protein. It is a member of fatty acid-binding proteins (FABPs) which are a family of carrier proteins for fatty acids and other lipophilic substances such as eicosanoids and retinoids. These proteins are thought to facilitate the transfer of fatty acids between extra- and intracellular membranes. FABP9 is found in midpachytene spermatocytes and round spermatids, and constitutes part of the perinuclear theca. Functionally, FABP9 is likely to link intracellular membranes, and may signal abnormal sperm formation during spermatogenesis.

Synonyms:

Fatty acid-binding protein 9, Testis lipid-binding protein, TLBP, Testis-type fatty acid-binding protein,

## **Product images:**

The extract of mouse testis (40ug) were resolved by SDS-PAGE, transferred to PVDF membrane and probed with anti-human FABP9 antibody (1:1000). Proteins were visualized using a goat anti-mouse secondary antibody conjugated to HRP and an ECL detection system.
