Fibronectin (FN1) Mouse Monoclonal Antibody [Clone ID: TV-1]

Product data:

Product Type: Primary Antibodies

Clone Name: TV-1

Applications: FC, IF, IHC, IP, WB

Recommended Dilution: ELISA: Use Antibody without BSA for Coating.

Flow Cytometry: 0.5-1 μg/106 cells. **Immunofluorescence:** 0.5-1 μg/ml.

Western Blot: 0.5-1 µg/ml.

Immunoprecipitation: 0.5-1 μg/500 μg protein lysate.

Immunohistochemistry on Frozen and Formalin-Fixed Paraffin Sections: 0.5-1 $\mu g/ml$ for

30 minutes at RT.

Staining of formalin-fixed tissues requires boiling tissue sections in 10mM Citrate buffer, pH

6.0, for 10-20 min followed by cooling at RT for 20 minutes.

Positive Control: SW156 cells or Kidney.

Reactivity: Human, Mouse, Porcine, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: T-cell lymphoma biopsy.

Specificity: Fibronectin is a soluble dimeric glycoprotein of 440kDa, which is present in cells, extracellular

matrix, and blood. This Monoclonal Antibody reacts with the cellular as well as plasma form

of fibronectin.

Reportedly, after iv administration, this MAb localizes to tumor vessels where it binds to the underlying basement. Epitope recognized by this antibody is not accessible in normal tissues to the circulating MAb indicating that it can be used to specifically target tumor vessels in vivo.

TV-1 is reportedly useful for delivering vasoactive agents to tumors to induce increased

vascular permeability or blood flow prior to treatment with chemotherapeutic drugs or MAbs.

Cellular Localization: Connective tissue matrix.

Fibronectin (FN1) Mouse Monoclonal Antibody [Clone ID: TV-1] - AM50271PU-T

Formulation: 10mM PBS

State: Purified

State: Liquid purified IgG fraction from Bioreactor Concentrate

Stabilizer: 0.05% BSA

Preservative: 0.05% Sodium Azide

Concentration: lot specific

Purification: Protein A/G Chromatography

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 220 kDa (monomer); 440 kDa (dimer)

Gene Name: fibronectin 1

Database Link: Entrez Gene 2335 Human

P02751

Background: Fibronectin is an extracellular matrix glycoprotein present on most cell surfaces, in

extracellular fluids and in plasma. A high molecular weight heterodimeric protein, it was originally discovered as a protein missing from the surfaces of virus-transformed cells, and it has been shown to be involved in various functions including cell adhesion, cell motility and wound healing. Alternative splicing and glycosylation give rise to several different forms of

Fibronectin, some of which exhibit restricted tissue distribution or association with

malignancies. It has been shown that Myofibroblast phenotype formation correlates with the occurrence of glycosylated Fibronectin and Fibronectin splice variants in Dupuytren's disease.

Synonyms: FN1, Cold-insoluble globulin, CIG
