Fibronectin (FN1) Mouse Monoclonal Antibody [Clone ID: 2755-8]

Product data:

Product Type: Primary Antibodies

Clone Name: 2755-8

Applications: ELISA, FC, IF, IHC, IP, WB

Recommended Dilution: ELISA: Use Antibody without BSA for Coating.

Flow Cytometry: $0.5-1 \mu g/10^6$ cells. Immunofluorescence: $0.5-1 \mu g/ml$.

Western Blot: 0.5-1 µg/ml.

Immunoprecipitation: 0.5-1 μg/500 μg protein lysate.

Immunohistochemistry on Frozen and Formalin-Fixed Paraffin Sections: 0.5-1 µg/ml for

30 minutes at RT.

Staining of formalin-fixed tissues requires boiling tiss ue sections in 10mM citrate buffer, pH

6.0, for 10-20 min followed by cooling at RT for 20 minutes.

Positive Control: SW156 cells or Kidney.

Reactivity: Human, Mouse, Porcine, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen:T-cell lymphoma biopsy.Specificity:Recognizes Fibronectin.

Cellular Localization: Connective tissue matrix.

Formulation: 10mM PBS

State: Purified

State: Liquid purified IgG fraction from Bioreactor Concentrate

Stabilizer: 0.05% BSA

Preservative: 0.05% Sodium Azide

Concentration: lot specific

Purification: Protein A/G Chromatography

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C.

Fibronectin (FN1) Mouse Monoclonal Antibody [Clone ID: 2755-8] - AM50272PU-T

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 220 kDa (monomer); 440 kDa (dimer)

Gene Name: fibronectin 1

Database Link: Entrez Gene 2335 Human

P02751

Background: Fibronectin is an extracellular matrix glycoprotein present on most cell surfaces, in

extracellular fluids and in plasma. A high molecular weight heterodimeric protein, it was originally discovered as a protein missing from the surfaces of virus-transformed cells, and it has been shown to be involved in various functions including cell adhesion, cell motility and wound healing. Alternative splicing and glycosylation give rise to several different forms of

Fibronectin, some of which exhibit restricted tissue distribution or association with

malignancies. It has been shown that Myofibroblast phenotype formation correlates with the occurrence of glycosylated Fibronectin and Fibronectin splice variants in Dupuytren's disease.

Synonyms: FN1, Cold-insoluble globulin, CIG
