FOXP3 Mouse Monoclonal Antibody [Clone ID: FXP3/197]

Product data:

Product Type: Primary Antibodies

Clone Name: FXP3/197
Applications: FC, IF, IHC, IP

Recommended Dilution: ELISA: Use BSA free Antibody for coating.

Flow Cytometry: 0.5-1 µg/million cells. **Immunofluorescence:** 0.5-1 µg/ml.

Immunoprecipitation: 0.5-1 μg/500 μg protein lysate.

Immunohistochemistry on Paraffin Sections: 1-2 ug/ml for 30 minutes at RT.

Positive Control: Tonsil, lymph node or Breast carcinoma.

Reactivity: Human, Monkey, Mouse

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full-length human FOXP3 protein.

Specificity: Recognizes a protein of 47-55kDa, which is identified as FOXP3. Its precise epitope is not

known, but it has been mapped to the N-terminal portion of the protein.

Cellular Localization: Predominantly nuclear, some cytoplasmic.

Formulation: 10mM PBS

State: Purified

State: Liquid purified IgG fraction from Bioreactor Concentrate

Stabilizer: 0.05% BSA

Preservative: 0.05% Sodium Azide

Concentration: lot specific

Purification: Protein A/G Chromatography

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: 47-55 kDa

FOXP3 Mouse Monoclonal Antibody [Clone ID: FXP3/197] - AM50273PU-S

Gene Name: forkhead box P3

Database Link: Entrez Gene 50943 Human

Q9BZS1

Background: The FOX family of transcription factors is a large group of proteins that share a common DNA

binding domain termed a winged-helix or forkhead domain. During early development, FOXP1 and FOXP2 are expressed abundantly in the lung, with lower levels of expression in neural, intestinal and cardiovascular tissues, where they act as transcription repressors. FOXP1 is widely expressed in adult tissues, while neoplastic cells often exhibit a dramatic change in expression level or localization of FOXP1. Mutations in FOXP3 gene cause IPEX, a fatal, X-linked inherited disorder characterized by immune dysregulation. The FOXP3 protein is essential for normal immune homeostasis. Specifically, FOXP3 represses transcription

through a DNA binding forkhead domain, thereby regulating T cell activation.

Synonyms: Forkhead box protein P3, IPEX, JM2, Scurfin
