

Product datasheet for **AP00859PU-N**

Saccharomyces cerevisiae Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	Western Blot. Antibody is useful for detection/removal of contaminants from recombinant preps.
Reactivity:	Saccharomyces cerevisiae
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Whole intact cells of <i>S. cerevisiae</i>
Specificity:	This antibody reacts to all antigens of <i>Saccharomyces cerevisiae</i> .
Formulation:	0.01M PBS, pH 7.2 containing 0.09% sodium azide State: Purified State: Liquid purified Ig
Concentration:	lot specific
Purification:	>95% pure. Protein A chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Background:	<i>Saccharomyces cerevisiae</i> also known as baker's yeast, is a genus of ascomycetes. They are normally diploid unicellular fungi that reproduce asexually by budding. Asci, containing four haploid ascospores, develop directly from the diploid vegetative cells by meiosis. After germination of the ascospores the haploid cells can reproduce vegetatively, or haploid cells of different mating type can fuse to form a diploid zygote. Most laboratory strains used are, in contrast to wild type yeasts, stable haploids.
