FGF17 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: ELISA, FN, WB

Recommended Dilution: Neutralization: To yield one-half maximal inhibition [ND50] of the biological activity of hFGF-

17 (1.5 ng/ml), a concentration of 0.020 - 0.035 μ g/ml of this antibody is required.

ELISA: Indirect: To detect hFGF-17 by indirect ELISA (using 100 μ l/well antibody solution) a concentration of 0.5 - 2.0 μ g/ml is required. In conjunction with compatible secondary reagents, it allows the detection of at least 0.2 - 0.4 ng/well of recombinant hFGF-17. Sandwich: To detect hFGF-17 by sandwich ELISA (using 100 μ l/well antibody solution) a concentration of 0.5 - 2.0 μ g/ml is required. This In conjunction with Biotinylated Anti-Human

FGF-17 as a detection antibody, it allows the detection of at least 0.2 - 0.4 ng/well of

recombinant hFGF-17.

Western Blot: To detect hFGF-17 by Western Blot analysis this antibody can be used at a concentration of 0.1 - $0.2 \mu g/ml$. Used in conjunction with compatible secondary reagents the detection limit for recombinant hFGF-17 is 1.5 - $3.0 \mu g/l$ ne, under either reducing or non-

reducing conditions.

Reactivity: Human

Host: Rabbit

Clonality: Polyclonal

Immunogen: Highly pure (> 98 %) recombinant human FGF-17

Specificity: This antibody detects Fibroblast Growth Factor 17.

Formulation: PBS, pH 7.2

State: Aff - Purified

State: Sterile filtered lyophilized Ig fraction

Reconstitution Method: Centrifuge vial prior to opening. Restore in sterile water to a concentration of 0.1 - 1.0 mg/ml.

Purification: Immunoaffinity chromatography

Conjugation: Unconjugated

Storage: Store the lyophilized antibody at -20 °C. Following reconstitution it is stable for two weeks at

2 - 8 °C. Frozen aliquots are stable for 6 months when stored at -20 °C. Avoid repeated

freezing and thawing.

FGF17 Rabbit Polyclonal Antibody - AP01121PU-S

Stability: Shelf life: One year from despatch.

Gene Name: fibroblast growth factor 17

Database Link: Entrez Gene 8822 Human

<u>O60258</u>

Background: FGF17 belongs to the heparin-binding growth factors family. It may be a signaling molecule in

the induction and patterning of the embryonic brain and is preferentially expressed in the

embryonic brain. There are two named isoforms.

Synonyms: Fibroblast growth factor 17, FGF-17
