

## Product datasheet for **AP01332PU-N**

### Peropsin (RRH) Rabbit Polyclonal Antibody

#### Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	<b>Western Blot:</b> 1/500-1/1000.
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Specificity:	Peropsin antibody detects endogenous levels of Peropsin protein. (region surrounding Asp237)
Formulation:	Phosphate buffered saline (PBS) with 0.05% sodium azide, approx. pH 7.2. State: Aff - Purified State: Liquid purified Ig fraction
Concentration:	1.0 mg/ml
Purification:	Affinity chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~ 37 kDa
Gene Name:	Homo sapiens retinal pigment epithelium-derived rhodopsin homolog (RRH)
Database Link:	<a href="#">Entrez Gene 10692 Human</a> <a href="#">O14718</a>

**Background:**

Peropsin is a visual pigment-like protein identified following large-scale sequencing of cDNAs derived from human ocular tissues. Peropsin mRNA is found in the retinal pigment epithelium (RPE) of the eye. Peropsin immunoreactivity, localizes the protein to the apical face of the RPE, and most prominently to the microvilli that surround the photoreceptor outer segments. It is thought that Peropsin may play a role in RPE physiology either in light detection as well as monitoring the concentration of retinoids (or other photoreceptor-derived compounds). It may play a role in retinal pigment epithelium physiology either by detecting light directly or by monitoring the concentration of retinoids or other photoreceptor-derived compounds.

**Synonyms:**

Peropsin

**Protein Families:**

Druggable Genome, Transmembrane

**Product images:**

Western blot (WB) analysis of Peropsin antibody (Cat.-No.: AP01332PU-N) in extracts from Jurkat/COLO cells.
