| Product Type:           | Primary Antibodies                                                                                                                                                  |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Applications:           | IF, IHC, WB                                                                                                                                                         |
| Recommended Dilution:   | Western Blot: 1/500-1/1000.<br>Immunofluorescence: 1/50-1/200.<br>Immunohistochemistry on Paraffin Sections: 1/50-1/200.                                            |
| Reactivity:             | Human, Mouse, Rat                                                                                                                                                   |
| Host:                   | Rabbit                                                                                                                                                              |
| Clonality:              | Polyclonal                                                                                                                                                          |
| Immunogen:              | Synthetic peptide, corresponding to amino acids 300-350 of Human Arfaptin 1.                                                                                        |
| Specificity:            | This antibody detects endogenous levels of Arfaptin-1 protein. (region surrounding Lys314)                                                                          |
| Formulation:            | Phosphate buffered saline (PBS), pH~7.2<br>State: Aff - Purified<br>State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE)<br>Preservative: 0.05% Sodium Azide |
| Concentration:          | 1.0 mg/ml                                                                                                                                                           |
| Purification:           | Affinity Chromatography using epitope-specific immunogen                                                                                                            |
| Conjugation:            | Unconjugated                                                                                                                                                        |
| Storage:                | Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.<br>Avoid repeated freezing and thawing.                                                |
| Stability:              | Shelf life: one year from despatch.                                                                                                                                 |
| Predicted Protein Size: | ~40 kDa                                                                                                                                                             |
| Gene Name:              | ADP ribosylation factor interacting protein 1                                                                                                                       |
| Database Link:          | <u>Entrez Gene 27236 Human</u><br><u>P53367</u>                                                                                                                     |

## **GRIGENE** ARFIP1 Rabbit Polyclonal Antibody – AP01383PU-M

Background:Arfaptin 1 is an ARF binding protein that inhibits PLD activation, vesicular trafficking and<br/>secretion. In the present report, we show that arfaptin 1 interacts with 'high speed'<br/>membranes independently of ARF. However, addition of myristoylated ARF3 (myrARF3)<br/>increases the association of arfaptin 1 with the membranes, suggesting that arfaptin 1 and<br/>ARF form a complex on the Golgi. Utilizing several deletion mutants of arfaptin 1 it is shown<br/>that the association of arfaptin 1 with myrARF3 is mediated via two binding sites on arfaptin<br/>1. These two domains are needed for arfaptin 1 inhibition of PLD activation by myrARF3 in<br/>vitro.

Synonyms: ARFIP1
