Product Type:	Primary Antibodies
Applications:	ELISA, IHC, IP, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections 1/50-1/200. Immunoprecipitation: 1/50-1/200.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Specificity:	This antibody detects endogenous levels of HER2 protein. (region surrounding Tyr877)
Formulation:	Phosphate buffered saline (PBS), pH~7.2 State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE). Preservative: 0.05% Sodium Azide
Concentration:	1.0 mg/ml
Purification:	Affinity Chromatography using epitope-specific immunogen.
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Predicted Protein Size:	~ 138, 185 kDa
Gene Name:	erb-b2 receptor tyrosine kinase 2
Database Link:	<u>Entrez Gene 2064 Human</u> <u>P04626</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

# Image: CRICENEHer2 (ERBB2) pTyr877 Rabbit Polyclonal Antibody - AP01603PU-MBackground:The EGF receptor family comprises several related receptor tyrosine kinases that are<br/>frequently overexpressed in a variety of carcinomas. Members of this receptor family include<br/>EGFR (HER1), Neu (ErbB-2, HER2), ErbB-3 (HER3), and ErbB-4 (HER4), which form either<br/>homodimers or heterodimers upon ligand binding. Neu, a 185 kDa glycoprotein, undergoes<br/>transactivation upon heterodimerization with other EGF receptor family members. Neu<br/>heterodimerization with ErbB-3 recruits heregulin, which induces phosphoinositide (PI) 3-<br/>kinase activation. Activation of Neu potentiates tumor cell motility and protease secretion and<br/>invasion, and also modulates cell cycle checkpoint function, DNA repair and apoptotic<br/>responses. Amplification and/or overexpression of Neu occurs in 20-30% of breast<br/>carcinomas. Measurement of increased Neu expression can be a predictor of disease<br/>prognosis. Neu may also prove to bea promising target for therapeutic agents.

Synonyms: HER-2, NEU, p185erbB2, NGL, c-erbB-2, MNL19
