

Product datasheet for AP01677PU-M

Rb (RB1) pSer807 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

IHC, WB **Applications:**

Recommended Dilution: Western Blot: 1/500-1/1000.

Immunohistochemistry on paraffin sections: 1/50-1/200.

Reactivity: Human, Mouse, Rat

Host: Rabbit

Clonality: Polyclonal

Specificity: This antibody detects endogenous levels of Rb pSer807 protein.

Formulation: Phosphate buffered saline (PBS), pH~7.2 containing 0.05% Sodium Azide as preservative.

State: Aff - Purified

State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE).

Concentration: 1.0 mg/ml

Purification: Affinity Chromatography using epitope-specific immunogen.

Conjugation: Unconjugated

Storage: Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: One year from despatch.

~ 106 kDa **Predicted Protein Size:**

Gene Name: RB transcriptional corepressor 1

Database Link: Entrez Gene 5925 Human

P06400

Background:

The genetic predisposition to retinoblastoma is transmitted by mutant alleles of the retinoblastoma susceptibility gene (Rb). Rb encodes a phosphorylated protein of approximately 110 kDa that accumulates in the nuclei of most vertebrate cells, but is lacking in all retinoblastomas examined to date. Mutations in Rb have been found in a wide variety of human tumors. The carboxy terminal domain of Rb p110 binds DNA, although no sequence specificity for this binding has been demonstrated. Inactivation of Rb can be mediated by its binding to the transforming proteins of several DNA tumor viruses, including SV40 T antigen and adenovirus E1A, perhaps accounting for their transforming function. Rb p110 is differentially phosphorylated during the cell cycle, implicating a possible role in cell cycle regulation.

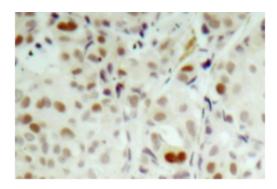

Synonyms:

Retinoblastoma 1, Rb, p105-Rb, pRb, pp110, OSRC
