

Product datasheet for AP01870PU-M

alpha Synuclein (SNCA) pSer129 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: ELISA, IHC **Recommended Dilution:** Western blot: 1/500-1/1000. Immunohistochemistry on Paraffin Sections: 1/50-1/200. **Reactivity:** Human, Mouse, Rat Host: Rabbit **Clonality:** Polyclonal Specificity: This antibody detects endogenous levels of SNCA protein only when phosphorylated at Ser129. Formulation: Phosphate buffered saline (PBS), pH~7.2 State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE). Preservative: 0.05% Sodium Azide **Concentration:** 1.0 mg/ml **Purification:** Affinity Chromatography using epitope-specific immunogen. **Conjugation:** Unconjugated Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Storage: Avoid repeated freezing and thawing. Stability: Shelf life: One year from despatch. Predicted Protein Size: ~ 18 kDa Gene Name: synuclein alpha Database Link: Entrez Gene 6622 Human P37840

	alpha Synuclein (SNCA) pSer129 Rabbit Polyclonal Antibody – AP01870PU-M
Background:	The synuclein family members, including α -synuclein (also designated NACP for non- β Amyloid component) and β -synuclein, are predominantly expressed in the brain and are speculated to be involved in synaptic regulation and neuronal plasticity. α -synuclein is localized to neuronal cell bodies and synapses. α -synuclein was first identified as a component of Alzheimer's disease amyloid plaques. Abnormal platelet function in Alzheimer's disease has been demonstrated. During megakaryocytic differentiation α - synuclein has been found to be upregulated, while β -synuclein is downregulated, indicating that coordinate expression of synucleins may be important during hematopoetic cell differentiation. A mutant form of α -synuclein has been found in patients with early onset Parkinson's disease.

Synonyms: NACP, PARK1
