

# Product datasheet for AP01891PU-N

## p95 NBS1 (NBN) pSer343 Rabbit Polyclonal Antibody

## **Product data:**

#### **Product Type: Primary Antibodies** IHC, WB **Applications:** Recommended Dilution: Western Blot: 1/500-1/1000. Immunohistochemistry on Paraffin Sections: 1/50-1/200. **Reactivity:** Human, Rat Host: Rabbit **Clonality:** Polyclonal Specificity: This antibody detects endogenous levels of Nibrin (p95/NBS1) pSer343 protein. Formulation: Phosphate buffered saline (PBS), pH~7.2 State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE). Preservative: 0.05% Sodium Azide **Concentration:** 1.0 mg/ml **Purification:** Affinity Chromatography using epitope-specific immunogen. **Conjugation:** Unconjugated Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Storage: Avoid repeated freezing and thawing. Shelf life: One year from despatch. Stability: Predicted Protein Size: ~95 kDa Gene Name: nibrin Database Link: Entrez Gene 4683 Human 060934

### **GRIGENE** p95 NBS1 (NBN) pSer343 Rabbit Polyclonal Antibody – AP01891PU-N

Background:The p95 gene (identical to NBS1 and nibrin) is a member of the hMre11/hRad50 double-<br/>strand break complex (MRN complex). This protein complex has been implicated in Nijmegen<br/>breakage syndrome, an autosomal recessive disorder marked by increased cancer incidence,<br/>cell cycle checkpoint deficits, and ionizing radiation sensitivity, thus revealing a direct<br/>molecular link between double-strand break repair and cell cycle checkpoint functions. In<br/>case of infection by adenovirus E4, the MRN complex is inactivated and degraded by viral<br/>oncoproteins, thereby preventing concatenation of viral genomes in infected cells. NBS1 is<br/>expressed ubiquitously and presents high levels in testis.

Synonyms: NBN, NBS, NBS1, P95
