

Product datasheet for AP02028SU-N

Glypican 4 (GPC4) (367-382) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: IHC, WB Recommended Dilution: Western blot (1/1000). Immunhistochemistry (1/1000). **Reactivity:** Human Host: Rabbit **Clonality:** Polyclonal Immunogen: Synthetic Glypican-4 peptide (aa367-382) coupled to KLH. Specific for a core protein epitope (aa 367-382) of Glypican-4. Specificity: Due to the highly conserved structure and sequence of Glypican-4, it might react also with Glypican-4 from other species, like Mouse. Formulation: State: Serum State: Lyophilized serum **Reconstitution Method:** Restore in aqua bidest to initial volume. **Conjugation:** Unconjugated Store lyophilized at 2-8°C for 6 months or at -20°C long term. Storage: After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: glypican 4 Database Link: Entrez Gene 2239 Human 075487 Background: Glypican-4, previously known as K-glypican, is a GPI-linked cell surface heparan sulfate proteoglycan of the glypican gene family, that comprises 6 members at present. Its function is only partially understood at present. However, glypican-4 seems to be involved in the control of cell growth and dif-ferentiation, especially in the development of the central nervous system and the kidney. Furthermore, glypican-4 is ex-pressed by hematopoetic stem cells and bone marrow stromal cells.
