

Product datasheet for **AP02069PU-S**

CCL14 Chicken Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Reactivity:	Human
Host:	Chicken
Clonality:	Polyclonal
Immunogen:	Native human Chemokine CC-1, poly Lysin conjugated
Specificity:	This antibody detects Chemokine CC-1.
Formulation:	State: Purified State: Lyophilized IgY
Reconstitution Method:	Restore in aqua bidest to 1 mg/ml.
Conjugation:	Unconjugated
Storage:	Store lyophilized at 2 - 8 °C and reconstituted at -20 °C. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Gene Name:	C-C motif chemokine ligand 14
Database Link:	Entrez Gene 6358 Human Q16627
Background:	The CC cytokines are secreted proteins characterized by two adjacent cysteines. The cytokine encoded by this gene induces changes in intracellular calcium concentration and enzyme release in monocytes. This gene expresses both monocistronic and bicistronic transcripts. Bicistronic transcripts include the upstream cytokine gene CCL15. In addition, CCL14 undergoes alternative splicing in the bicistronic transcripts; it is unknown if its monocistronic transcript is also subject to alternative splicing.
Synonyms:	C-C motif chemokine 14, Small-inducible cytokine A14, Chemokine CC-1/CC-3, HCC-1/HCC-3, NCC-2, SCYA14
Note:	LocusID 6346
Protein Families:	Druggable Genome, Secreted Protein
Protein Pathways:	Chemokine signaling pathway, Cytokine-cytokine receptor interaction
