

Product datasheet for **AP02075PU-N**

Macrophage inflammatory protein 5 (CCL15) Chicken Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Reactivity:	Human
Host:	Chicken
Clonality:	Polyclonal
Immunogen:	Native human Chemokine CC-2, poly Lysin conjugated
Specificity:	This antibody detects Native Chemokine CC-2.
Formulation:	State: Purified State: Lyophilized
Reconstitution Method:	Restore in aqua bidest to 1 mg/ml.
Conjugation:	Unconjugated
Storage:	Store lyophilized at 2 - 8 °C and reconstituted at -20 °C. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Gene Name:	C-C motif chemokine ligand 15
Database Link:	Entrez Gene 6359 Human Q16663
Background:	Macrophage inflammatory protein 5 (CCL15) is a member of the human beta-chemokine family and is chemotactic for T cells and monocytes but not neutrophils, eosinophils, or B cells. It induces changes in intracellular calcium concentration in monocytes and is thought to act through the CCR1 receptor but also binds to CCR3.
Synonyms:	C-C motif chemokine 15, Small-inducible cytokine A15, Chemokine CC-2, NCC-3, NCC3, MIP-5, MIP-1 delta, Leukotactin-1, Mrp-2b, SCYA15
Note:	LocusID 6359
