# Product datasheet for AP02227SU-S

### prothymosin, alpha (PTMA) Rabbit Polyclonal Antibody

#### **Product data:**

Product Type:	Primary Antibodies
Applications:	ELISA, IHC
Recommended Dilution:	ELISA: 1/4000. Immunohistochemistry on Frozen Sections: 1/50 (See Ref.1,2). Immunohistochemistry on Paraffin Sections: 1/100-1/1000 (See Ref.1,2).
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic Human Thymosin alpha-1,(aa 2-29) KLH conjugated
Specificity:	This antibody detects Thymosin alpha 1. There was no cross reactivity obtained against Human Thymosin beta-4 and Human Thymulin.
Formulation:	State: Serum State: Lyophilized serum
<b>Reconstitution Method:</b>	Restore in aqua bidest to initial volume
Conjugation:	Unconjugated
Storage:	Store lyophilized at 2-8°C and reconstituted at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Gene Name:	prothymosin, alpha
Database Link:	<u>Entrez Gene 5757 Human</u> <u>P06454</u>
Background:	The thymus gland produces several hormones or hormone-like substances which are derived from a polypeptide precursor containing (in the rat) 113 amino acids and known as prothymosin alpha. A peptide containing 28 amino acid residues, named thymosin alpha 1, was originally isolated from calf thymosin fraction 5 and shown to restore various aspects of immune function in several in vitro and in vivo test systems. Thymosin alpha 1 was subsequently isolated from a similar fraction from human thymosin and reported to have the same amino acid sequence as bovine thymosin alpha 1.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### Synonyms:

PTMA, TMSA, Thymosin alpha-1

## **Product images:**

Figure 1. Immunofluorescence of Thymosin alpha-1 staining of Paraffin Section of Human juvenile thymus. A: The section was incubated with AP02227SU (1/100) followed by an appropriate secondary antibody coupled to Cy3. The nuclei were stained with DAPI. Original magnification: x20. B: Control Section without primary antibody. Original magnification: x10.
